Soil Test Submission Form

Nothing tells us more about your soil's health than a investigation of the soil microbiology and the web of life living in the soil. Our examinations generates population estimates of the major trophic groups of soil organisms.

This form can be completed online or printed and sent with the soil sample. Delivery to our lab in Masanamaca.

Soil Test Submission Form
Link for instructions for collecting your soil sample and packaging for shipping is below.

The Results Report includes explanation of data with suggestions for improvement and microscope photographs of your soil. Your report will include biomass and quality assessments of each of the major soil trophic groups: Bacteria (aerobic/anaerobic, actinobacteria), Fungi (aerobic/anaerobic), Protozoa (flagellates, amoebae, ciliates), Nematodes (bacterial/fungal-feeding, omnivorous, predatory) and Microarthropods. This is a qualitative and quantitative report.
