

Saving the Soil Southern Ecuador

www.livingground.art

OUR PLAN
FOR EARTH
FOR LIFE
THE MISSION

Land degradation is a collective threat. We have a natural and profound way forward for Sustainable Agriculture, food production and Human Health. REGENERATE the microbes. Beneficial organisms convert and create life, nutrients, energy, health and bountiful ecosystems. A paradigm shift in science! It's Time! It's Necessary!

- * Establish Microbe Compost Center
- * Educate, Consult, Convert
- * Microscope Laboratory
- * Transform the Soils
- * Eradicate Chemical Dependency
- * Protect Sacred Lands and WATER-SHEDS
- * Create a reproducible model of sustainability
